## RESCIND NOTICE

### **Withdrawal of NANDTB recognition of AS3669 and Migration to EN4179 Non-destructive Testing –Qualification and approval of personnel–Aerospace**

In November 2019, the NANDTB of Australia announced that it would no longer accept applications for recognition to AS3669, and would actively promote migration to EN4179.

This decision was made primarily due to AS3669 lack of revision, and the associated and continued differences with EN4179. It should be noted that at this time, CASA will continue to recognise AS3669 for the qualification and approval of NDT personnel. After further industry discussion, the Board acknowledges that to dismiss recognition to AS3669 may be premature, hence the Board will maintain two separate procedures for the recognition of NDT Level 3 technical qualifications.

Procedure NA-019 for AS3669 and NA-024 for EN4179 can be found on this [NDTboard.com](http://NDTboard.com) website.

Rodd Smith
